

## **Developing number sense**

### **Information Sheet**

**Date:** Monday 16<sup>th</sup> September 2019

**Time:** 09:00 – 12:00

**Venue:** Long Sutton Primary School

**Venue address:** Dick Turpin Way, Long Sutton, Spalding, Lincs, PE12 9EP

**Course code:** LSP160919

**Course tutor:** Liz Gibbs

**Cost:** £45 per delegate (this fee includes £7.50 VAT)

Refreshments will be provided

#### **Audience for this course:**

- Maths subject leaders
- Reception and Year 1 Classroom teachers
- Teaching assistants
- Governors with an interest in EYFS and KS 1

#### **Aims:**

- To consider a mastery approach to teaching and learning through the expert use of variation theory and current classroom resources
- To experience a variety of themes and approaches to teaching number in the EYFS and Year 1
- To explore useful learning and teaching books and classroom resources
- To solve mathematical problems suitable for EYFS and Year 1.

#### **Course information:**

As the 2018-19 EYFS pilot draws to a close this summer and with the possible reduction of ELG in mathematics on the horizon, this course seeks to show how to support and develop young children's number sense.

During the morning, delegates will think about how they can to draw out number related concepts across a variety of common EYFS themes.

There will be the opportunity to experience a variety of activities and ideas that can be immediately used at school the next day and explore new number related books and resources.

At the end of the course, a pack of resources, including a pdf copy of the PowerPoint mini slides handout will be available via a Drop box download.

A camera, iPad or smart phone would be useful to bring to the course.
